EXPERIENCE

Full Stack Developer — Dec 2022 – Present
Agami Technologies Pvt. Ltd. — *Noida, IN*

- Serving as a key contributor to the development of **Stikkum**, a high-impact project focused on the US mortgage industry, with responsibilities that include implementing both front-end and back-end solutions to streamline mortgage processes and enhance the user experience.
- I actively contribute to **BeGenieUs**, a real-time chat platform, handling chat functionality, web page creation, and AI technology integration for enhanced user engagement and support.
- Contributed to the **Nediaz**, facilitating real-time communication between job seekers and various job-related requirements, including job listings, business partnerships, corporate employee needs, and more, through the development of an end-to-end chat system.
- Incorporating third-party APIs and services to enhance project functionality and expand its range of capabilities.

Office Dialer — May 2019 – Oct 2019
Teleperformance — *Jaipur, IN*

- Employed at Teleperformance with a focus on supporting Flipkart, one of India's leading e-commerce companies.
- Served as a crucial member of the backend team, responsible for handling distressed Flipkart customers.
- Excelled in the role of an Offline Dialer, where I efficiently communicated with customers and provided solutions to their issues

TECHNICAL SKILLS

Languages: Java, JavaScript
Frameworks: Spring Boot, Hibernate, Node.js, Vue.js
Web Technologies: Thymeleaf, JSP, HTML/CSS, AWS, JSON
Web Server: Apache Tomcat, NGINX
Databases: MySQL, Sequelize ORM, MongoDB
Developer Tools: Git (GitHub, GitLab), IntelliJ IDEA, Eclipse, VS Code
Libraries: jQuery, AJAX, SweetAlert, Toaster, Bootstrap, Sammy.js

PROJECTS

Stikkum | *Node.js, jQuery, Sammy.js, MySQL, Sequelize ORM, NGINX* [Link]

- Developed and managed "Stikkum," a US mortgage-based project that delivers custom alerts to users based on their specific requirements, with a focus on monetizing each alert.
- Enabled unlimited sub-accounts and branch accounts for users while providing specialised access control, enhancing the project's scalability and flexibility.
- Successfully integrated multiple APIs, including BoomBoom, Zapier, ChatGPT, and others, to enhance user experience and increase project versatility.
- Empower users to design custom templates and schedules based on alert responses and events, allowing for personalised behaviours in scheduled emails and SMS notifications, enhancing the project's adaptability to individual user needs.

SmartContectManager | *Spring Boot, Thymeleaf, Hibernate, jQuery, MySQL* [Link]

- Enhanced user experience through the implementation of user-friendly features that facilitate the effortless storage and organisation of a wide range of contact information, encompassing email addresses, contact images, and customizable data, thereby elevating the website's versatility and overall user-friendliness.
- I've enhanced security by integrating Spring Security with the login system, ensuring robust data protection and user authentication. Additionally, data encryption protocols have been implemented to safeguard sensitive info.
- Integrated a premium membership module with Razorpay to offer users the option for premium services.
- Integrated standard user modules include profile management, password updates, username and password recovery, and alert/notification messaging, delivering a comprehensive user experience.
- Ensured security with opt-based authentication to safeguard user data and privacy.

WebTech | *Advance Java, JavaScript, jQuery, Bootstrap, SweetAlert, MySQL, Apache Tomcat* [Link]

- Developed a website with a robust registration system featuring comprehensive validations and a secure login system, ensuring user data integrity and security.
- Designed a dynamic content-sharing platform where users can create and interact with posts across a wide range of computer programming categories, including Java, JavaScript, CSS3, HTML, Ruby, and more.
- Implemented user-centric features such as post management (creation, viewing, and deletion), user profile customization (including profile picture and password updates), and user-to-user interactions such as liking and commenting on posts.
- Empowered users with full control over their accounts, allowing them to delete their accounts while ensuring automatic removal of all their associated posts, ensuring a seamless user experience.
- Implemented seamless social interaction by integrating a Facebook plugin, enabling users to easily like, comment, and share posts, enhancing user engagement and social sharing capabilities on the platform.
